TOP NEWS OF THE MONTH

WATTLE AND WIRE BUSINESS TO CONTINUE THROUGH RADIAL TIMBER

>>> READ MORE

Radial Timber is proud to announce the acquisition of Wattle and Wire from Geoff and Susan Kennedy, who have spent the past 15 years building it into the successful business it is today. This is an exciting opportunity for us to grow and expand this exceptional fencing product. The integration will also enable us to utilise plantation thinning logs and other developing species from our own plantations—adding value across the entire rotation cycle.

READ MORE <<<

Radial Timber is now producing a range of mixed Australian hardwood firewood, split and bagged exclusively for our partner, The Dingley Woodshed. Sourced from thinning logs in our responsibly managed native hardwood plantations in Gippsland, this firewood makes use of timber not suitable for saw logs—ensuring that every part of the tree is put to good use and nothing goes to waste.

SUSTAINABLE FIREWOOD SUPPLIES

PLANTATION AND TIMBER MILL INDUSTRY FIELD TRIPS

>>> READ MORE

We'll be hosting more industry field visits to our timber mill and plantation sites in Yarram, Victoria later this year. It's a great opportunity to see firsthand how we operate and where your timber originates. Tickets for our September session will be available soon—stay tuned!

WATTLE AND WIRE BUSINESS ACQUISITION

Radial Timber is proud to announce the recent acquisition of Wattle and Wire from Geoff and Susan Kennedy, who have spent the past 15 years building it into the successful business it is today. This is an exciting opportunity for us to grow and expand this exceptional fencing product. The integration will also enable us to utilise plantation thinning logs and other developing species from our own plantations—adding value across the entire rotation cycle. We hope to continue in the spirit of what Geoff and Sue along with their staff built over the years and stay true to their vision to bring exciting, sustainable fencing products to the market.

Some features of this Fencing product include:

Natural Beauty

- A rustic, natural-style fencing solution that weaves small thinning logs or plantation-grown wattle between tensioned wires. The result is a distinctive, handcrafted look that blends seamlessly into the landscape.

Durability

- Naturally durable and designed to withstand the harsh Australian climate, this fencing offers long-lasting performance with minimal maintenance.

Sustainability

- Made from sustainably managed wattle and plantation grown thinning logs, this product transforms lower-value timber into high-value fencing. It supports responsible forest management and promotes a sustainable harvesting cycle.

Quick Installation

- Supplied in 2.5m to 10m rolls, it allows for fast and efficient installation—simply fix to the posts and plinth, tension and you're ready to go.

Pool Fence Approved

- Certified for use as a compliant pool fence (1.5m high with two-wire configuration), combining form, function, and safety.

We are currently in the process of setting up the manufacturing line and we are hoping to be producing products in the second half of this year - stay tuned and contact luke@radialtimbers.com.au for more information.

PLANTATION GROWN FIREWOOD

Radial Timber is now producing a range of mixed Australian hardwood firewood, split and bagged exclusively for our partner, **The Dingley Woodshed**. Sourced from thinning logs in our responsibly managed, native, hardwood plantations in Gippsland, this firewood makes use of timber not suitable for saw logs—ensuring that every tree is put to good use and nothing goes to waste.

Our firewood is harvested from carefully managed native hardwood plantations in Gippsland, designed for long-term environmental sustainability. These plantations operate on 30-year rotations, with periodic thinning carried out throughout the cycle to encourage healthier tree growth. The logs removed during thinning—often undervalued—are ideal for firewood and can also be used for products like bioenergy and bush poles.

By sourcing from these sustainable plantations, we produce high-quality firewood in a way that supports plantation health, habitat preservation, and carbon capture—while also easing the pressure on Australia's native forests. This reflects our commitment to delivering natural, Australian-grown hardwood products across all stages of the plantation lifecycle. We believe in maximising value from every tree we plant and respecting each phase of its growth.

JOIN OUR PLANTATION AND MILL INDUSTRY FIELD TRIPS

We are running free field trips to our **Plantation sites and Timber mill in Yarram, Vic** this year with the **next session in Early September**.

These educational tours of our Timber mill and plantations are designed to educate participants about our current practices and to show how we are trying to create a circular economy through innovative processes. Its a great opportunity to get out into the bush and see where your timber is actually coming from and the process it has to go through to get to the finished building products we know and love while also sharing ideas and thoughts with other industry professionals.

- **Educational Experience:** Learn about our timber production, from plantation management to milling and biochar production.
- **Sustainability Focus:** Discover our commitment to sustainability and how we are working towards a circular economy.
- **Hands-On Learning:** Get a firsthand look at our processes and see how we turn raw timber into high-quality products.
- **Industry focused:** Learn where your timber is coming from, tailored to architects' designers, builders and those in the timber/forestry industry.
- **Share ideas and knowledge:** Great to share ideas and knowledge with other industry professionals in the timber and construction industry.

If you are interested in joining one of our field trips, please email your interest to luke@radialtimbers.com.au to be added to the mail list for further information and to be updated on the next available sessions.

STAY CONNECTED

We are thrilled to share these updates and look forward to continuing to provide you with high-quality, sustainable timber products. Stay tuned for more news from Radial Timbers!

For any inquiries or to place an order, please contact us at sales@radialtimbers.com.au or visit our website www.radialtimbers.com.au.

Thank you for your continued support.

Warm regards,

The Radial Timber Team
